Introduction

©FAO/Adriano Timossi

WHO Assistant Director-General Naoko Yamamoto (left) and Director of the FAO Liaison Office with the UN in Geneva Dominique Burgeon (right) answer questions about food safety, food security and health. WHO Director of the Department of Nutrition and Food Safety Francesco Branca (centre) moderates a World Food Safety Day event at WHO headquarters.

For the fourth time, World Food Safety Day showed that governments, the food industry, non-profit organizations, academia, schools and consumers around the world are passionate about food safety. Celebrations kicked off on 7 March 2022, with the launch of this year's theme, "Safer food, better health".

Advocacy materials were made available, including social media cards, videos and a series of two-page fact sheets outlining good food handling practices for people working in traditional food markets, street food vending carts or canteens and those who eat at work, school, daycare centre or home. The [guide](#) provided event ideas, facts, figures and key messages.

This year's theme underlined how food safety has a direct impact on health. Unsafe food can cause 200 different diseases that impair growth, reduce nutritional intake, and result in lost days of school and work. The theme was also a reminder that if we are to ensure sustainably safe food, it must be produced and consumed within sustainable food systems.

This report provides a summary of this year's celebrations, using photographs that were kindly shared by organizations, institutions and individuals from around the world.

Nicole Sharon Affrifah explains how the University of Ghana is training the next generation of food business workers.

Tan Han Kiat of the Singapore Food Agency describes the transformation of traditional food markets.

Constanza Vergara Escobar speaks about food safety educational programmes conducted by the Ministry of Agriculture in Chile.

Suresh Kumar discusses how the Akshaya Patra Foundation in India keeps food safe in their school feeding programmes.

Tom Heilandt, Secretary of the Codex Alimentarius Commission, gives closing remarks at the global WHO/FAO event.

World Food Safety Day 2022 in pictures and numbers

World Food Safety Day aims to draw attention and inspire action to help prevent, detect and manage foodborne risks, contributing to food security, human health, economic prosperity, agriculture, market access, tourism and sustainable development.

This report gives a taste of the initiatives held for World Food Safety Day 2022 and shows how far-reaching this international observance has become. More than 450 initiatives took place in 109 countries including conferences, webinars, training sessions, workshops, quizzes, videos and more. Food safety advocates raised awareness and inspired action online and in person. The day also saw comprehensive coverage by media outlets across the world.

Learn more about this year's celebrations on the [World Food Safety Day website](#), or find out about food safety more generally on the [FAO](#), [WHO](#), [Codex Alimentarius](#) and [INFOSAN](#) websites.

The United Nations recognizes food safety

On 20 December 2018 the United Nations General Assembly adopted resolution [73/250](#) designating 7 June as World Food Safety Day.

The resolution invites all Member States, organizations of the United Nations system, other international and regional organizations, the private sector and civil society, including non-governmental organizations, individuals and other relevant stakeholders, to observe World Food Safety Day in an appropriate manner and in accordance with national priorities.
